Read the following passage, then answer the questions below:-

Helen packed a small suitcase and hurried out of the house to catch the bus to the station. There was no one else waiting at the bus stop, so it looked as if a bus had just left. Helen looked at her watch anxiously. It was already two o'clock. Her train leaves at two-thirty, and since it would take at least twenty minutes to reach the station, she did not have much time to spare. Just then a taxi came slowly down the road. Helen knew that the fare to the station was at least two pounds, which was more than she could afford; but she quickly made up her mind that it would be well worth the extra expense in order to catch her train. So she stopped the taxi and got in. She told the driver that she had to catch a train which leaves at two-thirty.

All went well until, just as they were coming out of a side-street into the main road that led to the station, the taxi ran into a car. There was a loud crash and Helen was thrown forward so *violently* that she hit her head on the front seat. Both drivers got out and began shouting at each other. Helen got out as well, asking *them* to stop quarrelling, but neither of them took any notice of her at all. She was wondering what to do when a bus came into sight, going in the direction of the station. The bus stop was not far off, so Helen got her suitcase out of the taxi and ran towards the bus, which had stopped to let some passengers get off. The bus conductor saw her running so he did not ring the bell for the bus to start until she had got on. Helen reached the station just in time and managed to catch her train after all.

Read the following passage then answer the questions below

A) choose the correct answer from a h c and d.

One day, a poor man, who had only one piece of bread to eat, was walking past a restaurant. There was a large pot of soup on the table. The poor man held his bread over the soup, so the steam from the soup went into the bread, and gave it a good smell .Then he ate the bread. The restaurant owner was very angry at this, and he asked the man for the money, in exchange for the steam from the soup. The poor man had no money, so the restaurant owner took him to Salim, who was a judge at that time. Salim thought about the case for a little while. Then he took some money from his pocket. He held the coins next to the restaurant owner's ear, and shook them, so that they made a *jingling* noise. "What was that?" asked the restaurant owner. "That was payment for *you*," answered Salim. "What do you mean? That was just the sound of coins!" protested the restaurant owner. "The sound of the coins is payment for the smell of the soup," answered Salim. "Now go back to your restaurant.

V-Reading Comprehension (6)

Read the following passage carefully, then answer the questions below:

Professor Ameen was a scientist who lived a quiet life with his wife. People called him absent-minded because he always forgets things. One day, he told his wife that he was going to fly next week to France. His wife Maha asked him where he was going to stay. "I don't know, yet", he said. Then, his wife asked him to send her the hotel's address in a telegram. Professor Ameen flew to Paris. He was lucky to find a good hotel in the centre of the city. He unpacked his things in his room and then he sent his wife a telegram to know where he was staying. He did not forget to put his hotel's address in <u>it</u>.

In the evening, he finished his work early, so he went to the Metro Cinema to watch a film. He came out at ten o'clock and dreamed of a nice dinner and a good sleep in his room. The driver of the taxi asked the professor where he wanted to go. <u>Unfortunately</u>, Mr. Ameen couldn't remember the name and address of the hotel. Professor Ameen got off the taxi and went to a telegraph office. There, he sent his wife another telegram. In it, he wrote, "Please send my hotel address at this telegraph office." What made things worse was that professor Ameen had to look for another hotel to spend the night as his wife didn't receive the first telegram.

COMPREHENSION

Read the following passage then answer the questions below:

Tsunami waves are larger and faster than normal surface waves. A tsunami wave can travel as fast as a jet plane and can be as tall as a ten-story building. Imagine dropping a stone into a pond. The water on the surface ripples. A tsunami is like a very powerful ripple. Tsunamis begin when the ocean rises or falls very suddenly. Large amounts of seawater are **displaced** top higher heights. This movement causes huge waves.

Most tsunamis are caused by underwater earthquakes. However, volcanoes, landslides and large icebergs, are capable of causing one of these mighty waves.

Tsunamis are extremely powerful. Ordinary waves lose power when they break. Tsunami waves can remain powerful for several days. Because tsunami waves are so strong and dangerous, **they** can kill people, damage property, and completely ruin an ecosystem in just one hour. Scientists have no way of predicting when a tsunami will hit. However, if a powerful enough earthquake occurs, scientists can issue a warning or a watch. A warning means that a tsunami will very likely hit soon. A watch means that conditions are favourable for a tsunami. When people are notified about a watch or a warning, they have more time to prepare. People should hastily move to higher ground to avoid dangers of tsunamis.
